

Resilience as the Pentagon Defines it!

Rear Admiral Craig Quigley, U.S. Navy (Ret.)

Executive Director

Hampton Roads Military and Federal Facilities Alliance

Traditional Definition

- More often than not, sea level rise or persistent flooding
- During Obama Administration, renewable energy included
- Conservation metrics as well (water, carbon footprint, etc.)

Current Definition

- Renewables for renewables sake is out the window!
- Ability to withstand cyber attacks, grid outages, power outages, storm recovery, etc.
- How quickly can you recover after taking a punch and get back to your mission?

The Way Ahead

- Both have a place at the table; not mutually exclusive!
- Renewables not necessarily evil!
- Cost matters!
- Energy outlook in the years ahead?
